Surface Embossing

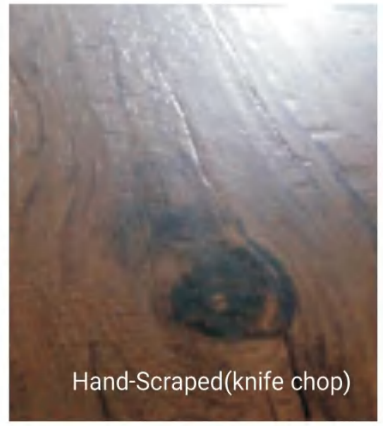

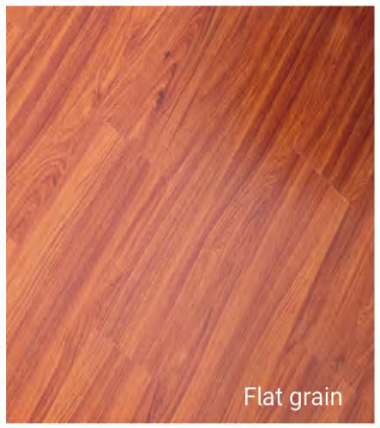

Exclusive embosses for enhanced designs

Getting Inspiration From The Nature
We have elegant wood
designs and exquisite stone designs.
You could feel the wood texture
with our embossing surface.

Real Touch

Ground Is A Kind Of Aesthetics,
the integral unity of layout and consider aesthetic control of the space,
those give birth to a magnificent chapter of art on the ground.

Pattern Chart

Herringbone

Wood planks are laid in a zigzag pattern, typically at a 90-degree angle to each other, creating a distinctive and elegant look.

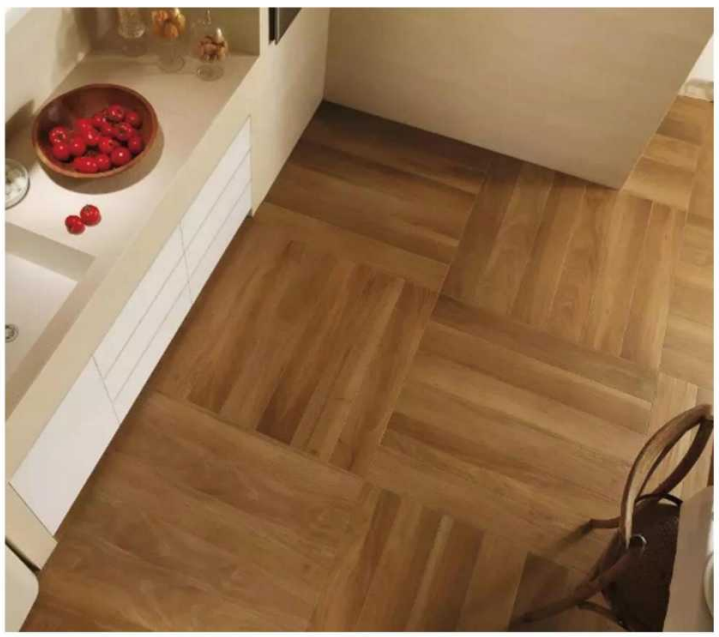

Chevron

Similar to herringbone, but with planks cut at a 45-degree angle and laid to form a continuous zigzag pattern, offering a modern twist on a classic design.

Mosaic

Arranged in a closely packed pattern to form an intricate design or pattern.

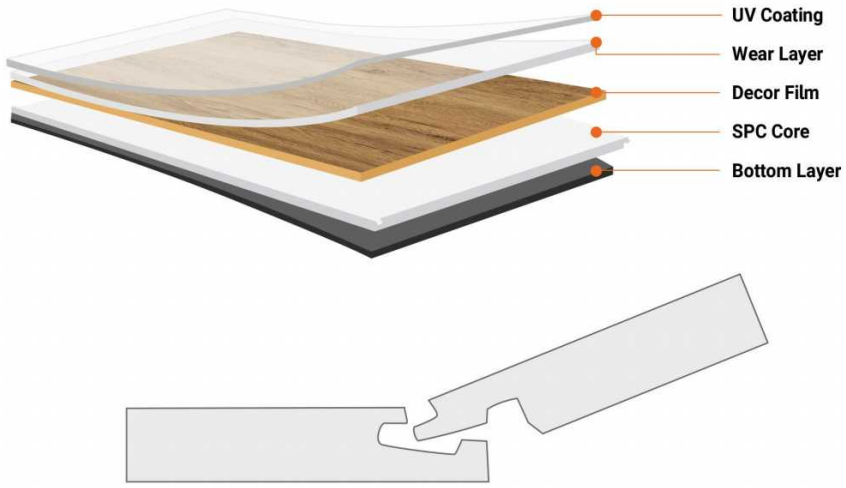

Brick Bond

The floors are laid in a staggered pattern, similar to the arrangement of bricks in a wall. Each row of boards is offset by half the length compared to the adjacent row, creating a cohesive and unified look. The resulting pattern resembles the pattern of bricks on a brick wall, hence the name "brick."

SPC Click Flooring Structure

SPC is a particularly new product in the flooring industry. It not only gathers most of the current flooring material, but also provides better performance by being waterproof, rigid, dimensionally stable, and relatively environmentally friendly. Thus it can be safely used in areas with sustained exposure to moisture, such as bathroom, laundry room, and kitchen. With good rigidity, SPC provides a quieter, warmer vinyl flooring with a cushioned backing attached.

SPC Click SPC is available with a locking system.

Molding

PVC floor accessories include PVC skirting boards, flush stair noses,
T-mouldings, end caps, reducers, stair noses, etc.
It has the characteristics of fireproof, waterproof, environmentally friendly,
easy to set up and clean, not easy to deform, wear-resistant,
and high strength, sound insulation, corrosion resistance, and aging resistance.

Trend

The end cap is used as the finishing touch of the flooring edge at the outside doors. We can match end cap molding with the color of your floor.

Flush Stair Nose

Flush Stair Nose can join your spc/wpc flooring directly with the click system.

Reducer

A reducer is used to create a smooth transition between two floors of different heights, as well as protect the planks.

Skirting

A skirting board is used around the edge of the room to hide the expansion gap between the flooring and the wall.

Stair Nose

Stair Nose combines style and function to enhance the beauty of a staircase or step.

T-Molding

T- Moldings are commonly used in doorways to join two floors in adjoining rooms.
